Gilbert; membership, Allyn L. Brown; roque, Frank H. Foss; tennis, J. O. D. Clark; house and grounds, A. W. Dickey, J. L. Case, A. W. Dickey, The club decided to erect a new building on the grounds for the exclusive use of women as a clubhouse, with lockers and equipment, and also to build a new court for their exclusive use. The present clubhouse will also be moved to the north and a new roque court will be constructed where it stands. This will make ten and it is needed because of the growing interest. One court will be fitted with new rubber banks and all the paraphernalia to make it the best possible for the use and consideration of the national association, with the hopes that they will decide to equip all the courts that way.

The Case: Chairmen of Committees are: Finance, Eventually Boyens of the East Side to celebrate bevening at the home of Miss Marietta Boyens of the East Side to celebrate her 14th birthday. She received a number of pretty gifts. Refreshments were eerved by Mrs. Boyens, assisted by Mrs. Folix Richotte, including cake, ice cream, fruit and candy. Washington, June 13.—The report of Lieut. Col. Harry Taylor on the improvements of the Mystic river has just been transmitted to congress by the secretary of war. It comes so late that the provisions recommended cannot be included in this year's river and harbor bill.

Lieutenant Colout Taylor says in his report that the survey shows that there has been considerable shoaling in the river. Below Noank the channel has maintained fiself fairly well, except that at the mouth of the river it has shoaled for a short distance to alout fourteen feet; that is, about one foot less than the original project depth. Above Noank a mid depth of fifteen feet or more is generally maintained, except for a short distance below the railroad bridge, but there is considerable shoaling along the sides, so that the channel is in places quite narrow; but, taken as a whole, the channel has maintained itself very well, considering the fact that no work has been done upon it for nearly twelveyears.

In his opinion the channel should be reatored to the dimensions of the original project; that is, fifteen feet and an owater and one hundred feet wide to Mystic.

If the dredging could be so carried on as to obtain a deepth of no more than fifteen feet the amount to be removed would be very small, but as in many places the cutting bank to give a depth of fifteen feet would be but a few liness with the same feet. In the estimate given by Colonal Taylor it has therefore been considering will be done that a cutting bank of at least one lumber yard.

necessary to obtain a channel fifteen feet. In the estimate given by Colonei Taylor it has therefore been considered that wherever any dredging will be done that a cutting bank of at least two feet would be allowed. On this assumption the amount of material which it will be necessary to remove to restore the channel to project dimensions below Noank is 1,200 cubic yards, and between Noank and Mystic 15,000 cubic yards, making a total of 162,000 cubic yards. The estimated cost

naintenance will be less than \$300 per tear. No extension of the project is leemed necessary, but in the opinion of Colonal Taylor the channel should be restored to the original project dimensions.

In compliance with the request of the project of the project dimensions.

Yale Varsity Won. On account of rough water the Yale crews waited until six o'clock Monday before going out for the afternoon practice, the three fours going first, followed by the two eights. Reed, who has been rowing No. 2 in the freshmen four, was put in at No. 4 in the freshman eight, displacing Brunbreb. The latter went in as stroke in the four displacing Scragg; Philbin was put in at No. 2 in the four. The fours went down stream as far as the navy yard and return in
